## Greenstar Intelligent Filling System 7738112911

**44.00\***

## GREENSTAR INTELLIGENT FILLING SYSTEM

If the system pressure becomes low, this revolutionary software allows the internal filling valve to automatically fill the heating system. Once optimum pressure has been reached it will automatically stop and close the integrated filling valve.

The Greenstar Intelligent Filling System will recognise a significant leak in the system and prevent the boiler from over-filling. The boiler will alert your customer if the heating system is losing too much pressure, reducing the need for pressure-related call outs.

# Next Evo X 16

GAS INSTANTANEOUS WATER HEATER

The Next Evo X gas instantaneous water heater is perfect for retrofitting in applications which have a high demand for hot water. With its sleek, user-friendly design, compact size and innovative functions, the unit is extremely efficient and simple to use. Plus, an intuitive LED display allows for easy temperature adjustment, as well as varying the flow of water required.
